

ISSUE 1: FALL 2012

Welcome to The Weekly Geek

This is a new e-newsletter from the Information & Instructional Technology Departments at Dakota County Technical College. Each week will have a different technology related topic with (hopefully) useful information for you.

Windows 7:

The one thing that is constant in technology is that it is always changing. Many of you may have already been upgraded to the Windows 7 operating system on your office or classroom computers. Unfortunately, the upgrade to your computer's operating system doesn't always instantly upgrade your own personal operating system (your brain) and now you can't find your files or programs and everything looks different than what you were used to. (Insert widespread grumbling, panic and cussing here).

In an effort to limit the freak-out factor – we put together some basic get started resources.

Here are some Windows 7 demonstration videos:
