

ISSUE 5: FALL 2012

Welcome to The Weekly Geek

This is a new e-newsletter from the Information & Instructional Technology Departments at Dakota County Technical College. Each week will have a different technology related topic.

Is your phone or camera full of photos and video that could use a little extra editing attention? Here are two free tools available online that do not have a huge learning curve to be able to do basic editing:

Photo Editor

[Photoshop.com](http://www.photoshop.com)

Sign up for a free AdobeID account and you will have access to an online photo editor similar to the Photoshop Elements software. You can do basic editing such as fixing red eye, blemishes, play with the color and crop your images. It also has some fun decorations and effects that you can apply to your images. The free account offers 2GB of online storage for your photos.

They even have a [free video series](#) for learning the basics of using Photoshop.com

Video Editor

<http://www.pixorial.com/>

Free online video editor. You can upload video from your phone or camera, add titles, edit out sections, re-arrange and make a finished video. You can also upload photos to create a slideshow with music. Offers 1GB of storage. If you have a Gmail account, it works with the new Google Drive and you can store video and photos there too. You can also easily export to YouTube, Facebook and other online social network sites.
