

DOMINIUMSM

June 18, 2014

Dear Hiring Committee,

Please accept this as my recommendation of Linda Foster, Director of Instructional Technology at Dakota County Technical College. I have worked with Linda in partnership on a Minnesota Job Skills Partnership Grant. She worked with DCTC Faculty as course developer to produce Life Safety and Interpersonal Communication course modules for our company.

Linda's course modules contain relevant, easy to follow concepts. Visually Linda's courses exceeded expectations. Her visual and audio components complement each other in a way that benefits the learner. She believes in creating training in "manageable chunks" so adult learners can complete training while continuing to perform job tasks.

Linda on more than one occasion said, "We can do whatever you want." She is accommodating and flexible. She will also do as much research and development on her own to create coursework and only request input when needed.

I truly believe that you will find that Linda will be an asset to your organization.

Sincerely,

Kate Brammer

Training Coordinator/Policy Specialist
